## The **PeakDual™27** Gaming Machine

## LATEST ADDITION TO THE PEAK FAMILY OF TOP PERFORMING CABINETS

## By Christine McCrory

As more units from the Peak family of cabinets continue to make their debut on gaming floors across the country, the striking effects of these stunning cabinets continue to be felt. But the Peak effect doesn't stop there. In this collection of cabinets focused on performance, player-driven design, and showstopping aesthetics, a new player has stepped onto the scene. The PeakDual<sup>™</sup>27 Gaming Machine now joins the Peak family, a perfect complement to IGT's global cabinet offering. With Peak, there is a gaming machine for every spot on your floor!

The new PeakDual<sup>™</sup>27 Gaming Machine was created with the perfect blend of comfort, aesthetics, usability, and convenience in mind. To enhance the gameplay experience, the PeakDual<sup>™</sup>27 design leverages a lowered screen position and a curved main screen for increased player engagement and comfort. The unified display assembly minimizes the observable gap between the main screen and top displays, offering players a multi-screen experience reminiscent of another fellow family member, the PeakSlant32<sup>™</sup>, but in an upright cabinet format. The PeakDual<sup>™</sup>27 cabinet's lower profile, modern look and feel, and innovative open-back concept offer improved sightlines on the gaming floor, while still maintaining a traditional 28" stand compatibility.

Like other members of the Peak family, the PeakDual<sup>™</sup>27 boasts a large 13.3" Dynamic Player Panel, an ergonomic button deck, and a USB and inductive wireless charging pad. All these elements combine to offer players a top-of-the-line gaming experience.

The PeakDual<sup>™</sup>27 strives to be the best cabinet for players, clearly designed with them in mind. What's good for the player is good for the game! By bringing greater clarity and screen resolution to play, the PeakDual<sup>™</sup>27 provides another prime opportunity to showcase the innovative, vibrant artwork of IGT's rich library of game content. Brand-new games as well as updates to player-favorite themes have been enhanced for improved content presentation on all members of the Peak family, and the PeakDual<sup>™</sup>27 is no exception.

With great game themes, player-first design, and a sleek, modern look, the PeakDual™27 is ready to take its place as the latest star joining the Peak family.
